

Findon, Aberdeen

A Deeside Self Build Case Study

Mr & Mrs George Knox chose to build their own home, now named 'Seascape' in Findon, Aberdeen. They knew they wanted a timber frame house due to the benefits in terms of speed of build, the ability to enhance the insulation value over a traditional build and to allow other trades to carry out their work quickly too.

The couple considered a few other suppliers, but appointed Deeside due to their positive experience on a previous project and knowledge of their strong support and customer service as well as high quality products.

The overall experience proved to be stress-free as Deeside handled the project very professionally, with careful attention to detail from the initial enquiry to the quote process, and technical specification to the actual build and supply.

The value for money was also noted by the Knox's as Deeside offered a service which added overall value to the project.

The end result

"As a result of Deeside's dedicated service we are delighted with our new home which was delivered to schedule. Deeside integrated with other trades on site and we would use them again. The back up is there and the product itself is first class." George Knox

KEY FACTS

- Designed by Deeside
- £300k build cost (excluding land)
- Full kit package
- Full build complete in 22 weeks
- Bespoke oak stair
- Superior quality specification
- Featured in upcoming series of 'My Flat Pack Home'
- Repeat customer
